Subject index of volume 105

Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Mice; Norepinephrine; Opiate; Retention; Serotonin; Septum **105**, 173

ACTH; Adrenal cortex; Ageing; Age-related; Lipofuscin; Steroids **105**, 1

Adrenal cortex; Ageing; Age-related; Lipofuscin; Steroids; ACTH **105**, 1

Ageing; Adrenal cortex; Age-related; Lipofuscin; Steroids; ACTH **105**, 1

Age-related; Adrenal cortex; Ageing; Lipofuscin; Steroids; ACTH **105**, 1

Ageing; Congenital anomalies; Mortality; Distribution of probability of death **105**, 319

Ageing; DNA polymerase; 3' → 5' Exonuclease; Proofreading; Fidelity; Mutation **105**, 75

Ageing; Fibroblasts; Oxidative stress; Glutathione peroxidase; DNA damage **105**, 137

Ageing; Human T-cells; Zeta chains; T-cell receptor signaling; Protein tyrosine kinases; Protein tyrosine phosphatases **105**, 115

Ageing; Mortality; Life expectancy **105**, 189

Ageing; Synaptosomal membranes; Plasma membrane Ca^{2+} -ATPase; Lipid fluidity; Electron paramagnetic resonance; Membrane spin probes **105**, 291

Ageing; T Lymphocyte; CD4; CD8; CD45RA; CD45R0 **105**, 241

Alzheimer's disease; rRNA **105**, 265

Apoptosis; *Suberites domuncula*; Sponges; Cell culture; Telomerase; Primmorphs; Senescence **105**, 45

Ascorbate; Calorie restriction; Emory; Retinol; α -Tocopherol; Cholesterol; Glucose; Glycohemoglobin **105**, 31

ATP-dependent; Dietary restriction; Oxidative stress; Ubiquitin; Liver; Paraquat **105**, 273

Aversive conditioning; Acetylcholine; Dopamine; GABA; Glutamate; Memory; Mice; Norepinephrine; Opiate; Retention; Serotonin; Septum **105**, 173

Biological age; Down's syndrome; Premature aging; Principal component model **105**, 89

Brain; Protein kinase C; Phospholipase C; Phospholipase D; Kidney; Spleen **105**, 151

Calorie restriction; Emory; Retinol; α -Tocopherol; Ascorbate; Cholesterol; Glucose; Glycohemoglobin **105**, 31

cDNA; Gene expression; Human diploid fibroblasts **105**, 105

CD45RA; T Lymphocyte; CD4; CD8; CD45R0; Aging **105**, 241

CD45R0; T Lymphocyte; CD4; CD8; CD45RA; Aging **105**, 241

CD8; T Lymphocyte; CD4; CD45RA; CD45R0; Aging **105**, 241

- CD4:** T Lymphocyte; CD8; CD45RA; CD45RO; Aging 105, 241
- Cell culture:** *Suberites domuncula*; Sponges; Telomerase; Primmorphs; Senescence; Apoptosis 105, 45
- Cholesterol:** Calorie restriction; Emory; Retinol; α -Tocopherol; Ascorbate; Glucose; Glycohemoglobin 105, 31
- Congenital anomalies:** Mortality; Aging; Distribution of probability of death 105, 319
- Cytochrome P450:** Succinate dehydrogenase; Lactate dehydrogenase; Rat; Liver 105, 197
- Cytometry:** HLA expression; Immunosenescence; Lymphocytes; Monocytes 105, 209
- Diabetes:** Glycation; Glycoxidation; Uremia; End-stage renal disease 105, 221
- Dietary restriction:** Oxidative stress; Ubiquitin; Liver; ATP-dependent; Paraquat 105, 273
- Distribution of probability of death:** Congenital anomalies; Mortality; Aging 105, 319
- DNA damage:** Aging; Fibroblasts; Oxidative stress; Glutathione peroxidase 105, 137
- DNA polymerase:** 3' \rightarrow 5' Exonuclease; Proofreading; Fidelity; Mutation; Aging 105, 75
- Dopamine:** Acetylcholine; Aversive conditioning; GABA; Glutamate; Memory; Mice; Norepinephrine; Opiate; Retention; Serotonin; Septum 105, 173
- Down's syndrome:** Biological age; Premature aging; Principal component model 105, 89
- Drosophila:** Fractionation; Mortality; Heterogeneity; Leveling off 105, 301
- Electron paramagnetic resonance:** Synaptosomal membranes; Plasma membrane Ca^{2+} -ATPase; Lipid fluidity; Membrane spin probes; Aging 105, 291
- Emory:** Calorie restriction; Retinol; α -Tocopherol; Ascorbate; Cholesterol; Glucose; Glycohemoglobin 105, 31
- End-stage renal disease:** Glycation; Glycoxidation; Diabetes; Uremia 105, 221
- 3' \rightarrow 5' Exonuclease:** DNA polymerase; Proofreading; Fidelity; Mutation; Aging 105, 75
- Fat diet:** Mice; Mobility restriction; Longevity; Stress 105, 61
- Fibroblasts:** Aging; Oxidative stress; Glutathione peroxidase; DNA damage 105, 137
- Fidelity:** DNA polymerase; 3' \rightarrow 5' Exonuclease; Proofreading; Mutation; Aging 105, 75
- Fractionation:** Mortality; Heterogeneity; Leveling off; *Drosophila* 105, 301
- GABA:** Acetylcholine; Aversive conditioning; Dopamine; Glutamate; Memory; Mice; Norepinephrine; Opiate; Retention; Serotonin; Septum 105, 173
- Gene expression:** cDNA; Human diploid fibroblasts 105, 105
- Glucose:** Calorie restriction; Emory; Retinol; α -Tocopherol; Ascorbate; Cholesterol; Glycohemoglobin 105, 31
- Glutamate:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Memory; Mice; Norepinephrine; Opiate; Retention; Serotonin; Septum 105, 173
- Glutathione peroxidase:** Aging; Fibroblasts; Oxidative stress; DNA damage 105, 137
- Glycation:** Glycoxidation; Diabetes; Uremia; End-stage renal disease 105, 221
- Glycohemoglobin:** Calorie restriction; Emory; Retinol; α -Tocopherol; Ascorbate; Cholesterol; Glucose 105, 31
- Glycoxidation:** Glycation; Diabetes; Uremia; End-stage renal disease 105, 221
- Heterogeneity:** Fractionation; Mortality; Leveling off; *Drosophila* 105, 301
- HLA expression:** Cytometry; Immunosenescence; Lymphocytes; Monocytes 105, 209

- Human diploid fibroblasts:** Gene expression; cDNA 105, 105
- Human T-cells:** Aging; Zeta chains; T-cell receptor signaling; Protein tyrosine kinases; Protein tyrosine phosphatases 105, 115
- Immunosenescence:** Cytometry; HLA expression; Lymphocytes; Monocytes 105, 209
- Integrin/adhesion molecules:** T lymphocytes; *Mycobacterium tuberculosis* 105, 19
- Kidney:** Protein kinase C; Phospholipase C; Phospholipase D; Brain; Spleen 105, 151
- Lactate dehydrogenase:** Cytochrome P450; Succinate dehydrogenase; Rat; Liver 105, 197
- Leveling off:** Fractionation; Mortality; Heterogeneity; *Drosophila* 105, 301
- Life expectancy:** Mortality; Aging 105, 189
- Lipid fluidity:** Synaptosomal membranes; Plasma membrane Ca^{2+} -ATPase; Electron paramagnetic resonance; Membrane spin probes; Aging 105, 291
- Lipofuscin:** Adrenal cortex; Ageing; Age-related; Steroids; ACTH 105, 1
- Liver:** Cytochrome P450; Succinate dehydrogenase; Lactate dehydrogenase; Rat 105, 197
- Liver:** Dietary restriction; Oxidative stress; Ubiquitin; ATP-dependent; Paraquat 105, 273
- Longevity:** Mice; Mobility restriction; Fat diet; Stress 105, 61
- Lymphocytes:** Cytometry; HLA expression; Immunosenescence; Monocytes 105, 209
- Membrane spin probes:** Synaptosomal membranes; Plasma membrane Ca^{2+} -ATPase; Lipid fluidity; Electron paramagnetic resonance; Aging 105, 291
- Memory:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Mice; Norepinephrine; Opiate; Retention; Serotonin; Septum 105, 173
- Mice:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Norepinephrine; Opiate; Retention; Serotonin; Septum 105, 173
- Mice:** Mobility restriction; Fat diet; Longevity; Stress 105, 61
- Mobility restriction:** Mice; Fat diet; Longevity; Stress 105, 61
- Monocytes:** Cytometry; HLA expression; Immunosenescence; Lymphocytes 105, 209
- Mortality:** Congenital anomalies; Aging; Distribution of probability of death 105, 319
- Mortality:** Fractionation; Heterogeneity; Leveling off; *Drosophila* 105, 301
- Mortality:** Life expectancy; Aging 105, 189
- Mutation:** DNA polymerase; 3'→5' Exonuclease; Proofreading; Fidelity; Aging 105, 75
- Mycobacterium tuberculosis:** T lymphocytes; Integrin/adhesion molecules 105, 19
- Norepinephrine:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Mice; Opiate; Retention; Serotonin; Septum 105, 173
- Opiate:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Mice; Norepinephrine; Retention; Serotonin; Septum 105, 173
- Oxidative stress:** Aging; Fibroblasts; Glutathione peroxidase; DNA damage 105, 137
- Oxidative stress:** Dietary restriction; Ubiquitin; Liver; ATP-dependent; Paraquat 105, 273
- Paraquat:** Dietary restriction; Oxidative stress; Ubiquitin; Liver; ATP-dependent 105, 273
- Phospholipase C:** Protein kinase C; Phospholipase D; Brain; Kidney; Spleen 105, 151
- Phospholipase D:** Protein kinase C; Phospholipase C; Brain; Kidney; Spleen 105, 151

- Plasma membrane Ca^{2+} -ATPase:** Synaptosomal membranes; Lipid fluidity; Electron paramagnetic resonance; Membrane spin probes; Aging 105, 291
- Premature aging:** Down's syndrome; Biological age; Principal component model 105, 89
- Primmorphs:** *Suberites domuncula*; Sponges; Cell culture; Telomerase; Senescence; Apoptosis 105, 45
- Principal component model:** Down's syndrome; Biological age; Premature aging 105, 89
- Proofreading:** DNA polymerase; 3' \rightarrow 5' Exonuclease; Fidelity; Mutation; Aging 105, 75
- Protein kinase C:** Phospholipase C; Phospholipase D; Brain; Kidney; Spleen 105, 151
- Protein tyrosine kinases:** Aging; Human T-cells; Zeta chains; T-cell receptor signaling; Protein tyrosine phosphatases 105, 115
- Protein tyrosine phosphatases:** Aging; Human T-cells; Zeta chains; T-cell receptor signaling; Protein tyrosine kinases 105, 115
- Rat:** Cytochrome P450; Succinate dehydrogenase; Lactate dehydrogenase; Liver 105, 197
- Retention:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Mice; Norepinephrine; Opiate; Serotonin; Septum 105, 173
- Retinol:** Calorie restriction; Emory; α -Tocopherol; Ascorbate; Cholesterol; Glucose; Glycohemoglobin 105, 31
- rRNA:** Alzheimer's disease 105, 265
- Senescence:** *Suberites domuncula*; Sponges; Cell culture; Telomerase; Primmorphs; Apoptosis 105, 45
- Septum:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Mice; Norepinephrine; Opiate; Retention; Serotonin 105, 173
- Serotonin:** Acetylcholine; Aversive conditioning; Dopamine; GABA; Glutamate; Memory; Mice; Norepinephrine; Opiate; Retention; Septum 105, 173
- Spleen:** Protein kinase C; Phospholipase C; Phospholipase D; Brain; Kidney 105, 151
- Sponges:** *Suberites domuncula*; Cell culture; Telomerase; Primmorphs; Senescence; Apoptosis 105, 45
- Steroids:** Adrenal cortex; Ageing; Age-related; Lipofuscin; ACTH 105, 1
- Stress:** Mice; Mobility restriction; Fat diet; Longevity 105, 61
- Suberites domuncula*:** Sponges; Cell culture; Telomerase; Primmorphs; Senescence; Apoptosis 105, 45
- Succinate dehydrogenase:** Cytochrome P450; Lactate dehydrogenase; Rat; Liver 105, 197
- Synaptosomal membranes:** Plasma membrane Ca^{2+} -ATPase; Lipid fluidity; Electron paramagnetic resonance; Membrane spin probes; Aging 105, 291
- T-cell receptor signaling:** Aging; Human T-cells; Zeta chains; Protein tyrosine kinases; Protein tyrosine phosphatases 105, 115
- Telomerase:** *Suberites domuncula*; Sponges; Cell culture; Primmorphs; Senescence; Apoptosis 105, 45
- T Lymphocyte:** CD4; CD8; CD45RA; CD45R0; Aging 105, 241
- T lymphocytes:** *Mycobacterium tuberculosis*; Integrin/adhesion molecules 105, 19
- α -Tocopherol:** Calorie restriction; Emory; Retinol; Ascorbate; Cholesterol; Glucose; Glycohemoglobin 105, 31
- Ubiquitin:** Dietary restriction; Oxidative stress; Liver; ATP-dependent; Paraquat 105, 273
- Uremia:** Glycation; Glycoxidation; Diabetes; End-stage renal disease 105, 221
- Zeta chains:** Aging; Human T-cells; T-cell receptor signaling; Protein tyrosine kinases; Protein tyrosine phosphatases 105, 115
